Front End

Node.JS Express

React / Vue / Next

HOBBIES

3d Modeling, 3d printing, Raspberry Pi enthusiast, Unity Game Dev.

PROFILE

I am a dedicated Full Stack JavaScript Developer with a passion for well written code. I am constantly looking to improve myself in my craft. I am proficient in Node.js and React, and I really enjoy crafting dynamic web applications that integrate the front-end interfaces with back-end systems. Taking an idea to reality is what really motivates me.

Having created my own full stack applications from the initial concept to the post-production stage, the growth and insight I have gained from working through that process has been invaluable to me. Every time I build something I learn, enabling me to write code in a more efficient and testable way, with more foresight in how I should write it with respect to the future of the application. I am excited to find a company to work and build for so I can do what I love: to continue to grow my knowledge and skills in software and see that growth each time I sit down to write. To me computer programming is an art. It's how you write it, and EVERY detail matters.

EMPLOYMENT HISTORY

Assistant Bar Manager at Pandemonium, Covington
January 2021 — Present

Crafting cocktails and providing exceptional customer experiences. Managing co-workers and ensuring quality service while catering to individual customer preferences. collaborating efficiently with fellow bartenders as a strong team player with excellent communication skills. Inventorying roughly $3000 of products weekly.

Software Dev at Jordan Bell WebDev
September 2022 — Present

Being self managed. Being a self starter and self motivated. Everyday making a commitment and sticking to my goals. Becoming self taught and falling in love everyday with the process of learning and growth via application. Managing working with the most demanding boss I could have. Which is myself.

EDUCATION

High School, ECOT, Cincinnati

I attended online school so that I was able to graduate a year early and work at the local Gold Star in Ross Ohio to support my family. I originally went to Ross High School.

COURSES

Double-Stack JavaScript Dev, The Odin Project
July 2022
